

Leland and Gray

USE OF SCHOOL FACILITIES

POLICY

The Leland and Gray School Board recognizes that the primary function of the school facilities and equipment is to provide optimal educational experiences for the students of the District. The Board also wishes to encourage the fullest use of school facilities by the residents of the School District and Windham Central Supervisory Union whenever such facilities are not being used for school-related activities.

This policy is designed to encourage broader use of these facilities by those groups and agencies that supplement the educational, cultural, civic, social and governmental activities of the students and their community.

PROCEDURES

The Principal will create procedures that allow efficient implementation of this policy. Procedures may include requirements regarding eligibility for use, purpose of use, safety, security, liability, insurance, fees, and/or stipulations for requesting organizations.
